11-0201. Definitions.--For purposes of this article, certain words and phrases used herein are defined as follows:

1. "Ambient noise" is the all-encompassing noise associated with a given environment, being usually composite of sounds from many sources, near and far.

2. "'A' band level" is the total sound level of all noise as measured with a sound level meter using the "A" weighting network. The unit measurement is the dB(A). "dB" is the abbreviation for decibel. "dB(A)" is a weighted decibel which closely approximates the human ear response to sound.

3. "Bel" is the common logarithmic value of any sound intensity as related to the standard threshold of audibility (minimum detectable sound 10^{-12} watts per square meter).

4. "Decibel" is one-tenth (1/10) of a bel as measured on the "A" scale of a standard sound meter.

5. "Cycle" is the complete sequence of value of a periodic quantity that occur during a period.

6. "Frequency" of a function periodic in time is the reciprocal of the primitive period. The unit is the cycle per unit time and must be specified.

7. "Sound-level meter" is an instrument including a microphone, an amplifier, an output meter, and frequency weighting networks for the measurement of noise and sound levels in a specified manner.

8. "Person" is a person, person's firm, association, co-partnership, joint venture, corporation or any entity public or private in nature.

9. “Emergency work” is work made necessary to restore property to a safe condition following a public calamity or work required to protect persons or property from an imminent exposure to danger.

10. “Emergency vehicles” are those vehicles such as ambulance, fire, police, and other city vehicles operating in time of emergency.

- A. The volume of the noise.
- B. The intensity of the noise.
- C. Whether the nature of the noise is usual or unusual.
- D. Whether the origin of the noise is natural or unnatural.
- E. The volume and intensity of the background noise, if any.
- F. Within the central business district (area bounded by First Avenue South, Seventh Avenue North, Fourth Street and Eighth Street), the following noises between the hours of 10:00 p.m. and 6:00 a.m. are specifically prohibited, provided, however, that the 10:00 p.m. closing time may be extended by special permit secured from the board of city commissioners:
 1. Radios, tape players or other sound amplifiers, whether portable or installed in vehicles, at a level which can be heard by a person more than 10 feet away from said vehicle or amplifier.
 2. Any horn, bell or other noise-making device except emergency warning devices.
 3. Shouting or yelling where the voice is clearly audible at a distance of more than 10 feet.

- A. Sound or noise projecting from one use district, into another use district with a different noise level limit, shall not exceed the limits of the district into which the noise is projected.
- B. The permissible levels in decibels set forth in Table 1 shall be modified so that any noise occurring on property deemed to be nonconforming use property shall be determined upon the conforming zoning designation of the property.
